MJHS Construction Project

This summer Marshall Junior High School is getting some updates. Renovations to the junior high will be focused on the east end of the building, which was the original junior high school built in 1956.

General Project Details

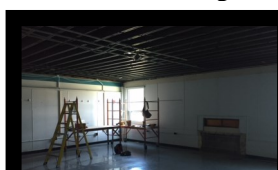

- There will be all new ceiling tiles/pads to match the newer, west end of the building.
- New electrical and lighting will also be installed.
- New windows on the east end of the building and new entry doors with electronic card access.
- Existing window cooling units and heating system will be replaced and a brand new HVAC system installed
- Improvements and installation to the security monitoring system along with updates and clean up to computer network cables and server system.

A BIG THANK YOU!

I would like to thank all of the students, teachers, and custodians for their time and hard work in preparing our building for this undertaking. Students on the last day of school helped carry desks, chairs, tables, and other items to the stage. I was extremely proud of our students, as well as our teachers in organizing the move. It takes everyone's efforts and cooperation to make something such as this happen.
